## A Vicious Act

It's a dirty, hateful, vicious, potentially murderous sort of act that really amounts to treason—except that it apparently is not against the law.

We are speaking of the subversive and dangerous publication by some enemies of our national welfare of the names of people throughout the world who are reported to be agents of the CIA.

We need the CIA and more for our safety. The CIA is the first line

of defense in this world threatened by Communist aggression. But "Covert Action Information Bulletin," published in Washington, has sought to undermine our intelligence capabilities by printing the names and biographical background of 39 people it says are CIA operatives. This could hinder our efforts to know what the enemy is doing. It could get people killed.

It is a sorry attack upon all Americans.
